

HOUSTON LEADING THE ENERGY TRANSITION

YEAR IN REVIEW 2024

“ Through our collective efforts, the world is recognizing something we Houstonians have known for years – the world’s ability to meet the dual challenge of more energy with significantly less emissions requires a new level of collaboration across our entire energy ecosystem – including government, academia, startups, incubators, investors, and our incumbent energy industry – which has the assets, the resources, and the know-how to scale solutions for an energy-abundant, low-carbon future.”

BOBBY TUDOR

Chair, Houston Energy Transition Initiative

JANE STRICKER

Sr. Vice president, Houston Energy Transition Initiative

HETI CREATES VALUE FOR MEMBERS BY

CONVENE FOR **IMPACT**

Lead critical conversations on the energy transition—including emissions reduction, energy security, and affordability

COMMUNICATE FOR ECONOMIC **DEVELOPMENT**

Tell Houston’s unique energy story to drive economic development and talent attraction

ADVOCATE FOR SOUND **POLICY**

Champion all forms of energy and emissions reduction—driving issues with a unique impact on Houston

ENGAGE **COMMUNITIES**

Build the excitement and alignment needed amongst stakeholders to build businesses that create opportunities

CONVENE FOR IMPACT

MOU ANNOUNCEMENT

“The U.S. Department of Energy’s national laboratories have long been the backbone of research, development, and demonstration for the energy sector. The Partnership and HETI, working with our industry members, business community and top research and academic institutions, in collaboration with Argonne, will work across our energy innovation ecosystem to drive this critical effort for our region.”

Bobby Tudor
CEO of Artemis Energy Partners and Chair of HETI

STARTUP WEEK

“Houston is uniquely positioned to tackle the greatest challenge of our time – producing more energy with fewer emissions. This city is where energy innovation scales and opportunity thrives. As a natural hub for startups and investors, Houston brought this to life during Houston Energy and Climate Startup Week. Years in the making, this event was launched to answer the question: Can the whole be greater than the sum of its parts? This week proved it can. We look forward to continue building on this successful week.”
